DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 15, lines 11-13 recites "***wherein if not current is detected by the current detecting means, if the detected current value exceeds the predetermined current threshold, or the if the detected current value does not exceed the predetermined current threshold***". It is not possible for the detected current value to exceed a predetermined threshold if no current is detected.
4. Claim 16 is rejected because it is dependent on claim 15.
5. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.
6. Claim 17, lines 8-12 recites "***control means which prohibits a reading operation if an LED block adjacent to an LED block where the detection means has detected any faulty LED elements has any faulty LED elements and for permitting the reading operation unless the LED block adjacent to the LED block where the detection means has detected any faulty LED elements has any faulty***".

LED elements". It is difficult for the examiner to understand the claim language and perform a proper search for the claim limitations.

7. Claims 18 and 19 are dependent on claim 17.
